DETAILED ACTION

Drawings

Figure 1 and 2 should be designated by a legend such as --Prior Art-- because only that which is old is illustrated. See MPEP § 608.02(g). Corrected drawings in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. The replacement sheet(s) should be labeled "Replacement Sheet" in the page header (as per 37 CFR 1.84(c)) so as not to obstruct any portion of the drawing figures. If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Claim Rejections - 35 USC § 101

35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

Claims 1, 5-11 are rejected under 35 U.S.C. 101 because the claimed invention is directed to non-statutory subject matter.

Claims 1, 5-11 are rejected under 35 U.S.C. 101 because according to par 0079, 0081, 0087, 0088, 0089, 0107, 0108, 0109, and 0110 of the specification, extracting means, calculating means, multiplexing means, and second calculating means are preferably configured as a software. "A data multiplexer" comprising extracting means, calculating means, multiplexing means, and second calculating means (i.e., software) does not include any functional hardware structure of a "data multiplexer" A data multiplexer (i.e., apparatus) comprising software is considered as program per se, which is not one of the categories of statutory subject matter.

Allowable Subject Matter

Claims 3 and 4 are allowed.

The following is a statement of reasons for the indication of allowable subject matter:

The reasons for allowance is based on Applicant's statements filed in 4/15/08, Page 3 and Page 4 of the Pre-Brief Conference request, and none of the prior art of records teach or suggest the following features:

Applicant stated that "...multiplexing cycle can be considered equivalent to a time to leak 188-byte data" (see Page 3 of the Pre-Brief Conference Request filed in 4/15/08) and "the time division multiplexing cycle is irrespective of the transport rate of said plurality of bit streams" (see Page 4 of the Pre-Brief Conference Request filed in 4/15/08).
